Title: US-10-798-090A-305
Perfect score: 1773
Sequence: 1 augaccugcacaauacag.....cacccgagcagccuugag 1773

Scoring table: IDENTITY NUC
Gapop 10.0, Gapext 0.5

Searched: 1605 seqs, 32073 residues

Total number of hits satisfying chosen parameters: 3210

Minimum DB seq length: 0
Maximum DB seq length: 200000000

Post-processing: Minimum Match 0%
Maximum Match 100%
Listing first 1607 summaries

Database : rnpbm.subdb:*

Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

SUMMARIES

SEQ ID NO 237
LENGTH: 21
TYPE: RNA
ORGANISM: Artificial Sequence
FEATURE:
OTHER INFORMATION: Description of Artificial Sequence: s1nA antisense region
FEATURE:
NAME/KEY: misc_feature
LOCATION: (2)..(3)
OTHER INFORMATION: 2'-deoxy-2'-fluoro
FEATURE:
NAME/KEY: misc_feature
LOCATION: (5)..(9)
OTHER INFORMATION: 2'-deoxy-2'-fluoro
FEATURE:
NAME/KEY: misc_feature
LOCATION: (11)..(12)
OTHER INFORMATION: 2'-deoxy-2'-fluoro
FEATURE:
NAME/KEY: misc_feature
LOCATION: (15)..(15)
OTHER INFORMATION: 2'-deoxy-2'-fluoro
FEATURE:
NAME/KEY: misc_feature
LOCATION: (17)..(18)
OTHER INFORMATION: n stands for thymidine
FEATURE:
NAME/KEY: misc_feature
LOCATION: (20)..(21)
OTHER INFORMATION:
FEATURE:
NAME/KEY: misc_feature
LOCATION: (20)..(20)
OTHER INFORMATION: Phosphorothioate 3'-Internucleotide linkage

XX (SIRN-) SIRNA THERAPEUTICS INC.
XX
XX PI Richards I, Macswiggen J;
XX
XX WPI; 2005-356237/36.
XX
XX New short interfering nucleic acid molecule that directs cleavage of a
XX cholinergic receptor muscarinic 3 RNA, useful for treating or preventing
XX respiratory and pulmonary diseases, e.g. chronic obstructive pulmonary
XX disease.
XX
XX PS Claim 33; SEQ ID NO 218; 184bp; English.
XX
XX The invention relates to a chemically synthesized double stranded short
XX interfering nucleic acid (siNA) molecule that directs cleavage of a
XX cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
XX (RNAi). The siNA molecule, compounds, compositions, and methods are
XX useful for treating or preventing respiratory and pulmonary diseases,
XX disorders, and/or conditions, including chronic obstructive pulmonary
XX disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
XX cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The
XX present sequence represents a cholinergic receptor muscarinic 3 siRNA.

PT New short interfering nucleic acid molecule that directs cleavage of a
PT cholinergic receptor muscarinic 3 RNA, useful for treating or preventing
PT respiratory and pulmonary diseases, e.g. chronic obstructive pulmonary
PT disease.
XX
PS Claim 33; SEQ ID NO 272; 184pp; English.
XX
CC The invention relates to a chemically synthesized double stranded short
CC interfering nucleic acid (siNA) molecule that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
CC (RNAi). The siNA molecule, compounds, compositions, and methods are

PT disease.
XX
XX Claim 33; SEQ ID NO 298; 184pp; English.
XX
CC The invention relates to a chemically synthesized double stranded short
CC interfering nucleic acid (siRNA) molecule that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
CC (RNAi). The siRNA molecule, compounds, compositions, and methods are
CC useful for treating or preventing respiratory and pulmonary diseases,
CC disorders, and/or conditions, including chronic obstructive pulmonary
CC disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
CC cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The
CC present sequence represents a cholinergic receptor muscarinic 3 siRNA.

CC The invention relates to a chemically synthesized double stranded short
CC interfering nucleic acid (siNA) molecule (I) that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA through RNA interference,
CC where each strand of (I) has 19-23 nucleotides, and does not require the
CC presence of nucleotides having a 2-hydroxy group for mediating RNA
CC interference. (I) is useful for treating diseases e.g., asthma, allergic
CC rhinitis, sinusitis, inflammation, allergy, cystic fibrosis, pulmonary
CC vasoconstriction or hypertension, emphysema, irritable bowel syndrome,
CC Alzheimer's disease or urinary incontinence. (I) has increased resistance
CC towards nuclease. Double stranded short interfering nucleic acid molecule
CC was produced by solid phase oligonucleotide synthesis method. This
CC sequence represents an example of a siRNA molecule of the invention.

PT Novel chemically synthesized double stranded short interfering nucleic
PT acid molecule that directs cleavage of cholinergic receptor muscarinic 3
PT RNA through RNA interference, useful for treating asthma.
XX
PS Disclosure; SEQ ID NO 270; 84bp; English.
XX
CC The invention relates to a chemically synthesized double stranded short
CC interfering nucleic acid (siNA) molecule (I) that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA through RNA interference,
CC where each strand of (I) has 19-23 nucleotides, and does not require the
CC presence of nucleotides having a 2-hydroxy group for mediating RNA
CC interference. (I) is useful for treating diseases e.g., asthma, allergic
CC rhinitis, sinusitis, inflammation, allergy, cystic fibrosis, pulmonary
CC vasoconstriction or hypertension, emphysema, irritable bowel syndrome,
CC Alzheimer's disease or urinary incontinence. (I) has increased resistance

CC towards nuclease. Double stranded short interfering nucleic acid molecule
CC was produced by solid phase oligonucleotide synthesis method. This
CC sequence represents an example of a siRNA molecule of the invention.

XX
XX      Novel chemically synthesized double stranded short interfering nucleic
XX      acid molecule that directs cleavage of cholinergic receptor muscarinic 3
XX      RNA through RNA interference, useful for treating asthma.
XX
XX      Disclosure; SEQ ID NO 208; 84bp; English.
XX
XX      The invention relates to a chemically synthesized double stranded short
XX      interfering nucleic acid (siNA) molecule (I) that directs cleavage of a
XX      cholinergic receptor muscarinic 3 (CHRM3) RNA through RNA interference,
XX      where each strand of (I) has 19-23 nucleotides, and does not require the
XX      presence of nucleotides having a 2-hydroxy group for mediating RNA
XX      interference. (I) is useful for treating diseases e.g., asthma, allergic
XX      rhinitis, sinusitis, inflammation, allergy, cystic fibrosis, pulmonary
XX      vasoconstriction or hypertension, emphysema, irritable bowel syndrome,
XX      Alzheimer's disease or urinary incontinence. (I) has increased resistance
XX      towards nuclease. Double stranded short interfering nucleic acid molecule
XX      was produced by solid phase oligonucleotide synthesis method. This
XX      sequence represents an example of a siRNA molecule of the invention.

PT Novel chemically synthesized double stranded short interfering nucleic
PT acid molecule that directs cleavage of cholinergic receptor muscarinic 3
PT RNA through RNA interference, useful for treating asthma.
XX
PS Disclosure; SEQ ID NO 220; 84bp; English.
XX
CC The invention relates to a chemically synthesized double stranded short
CC interfering nucleic acid (siNA) molecule (I) that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA through RNA interference,
CC where each strand of (I) has 19-23 nucleotides, and does not require the
CC presence of nucleotides having a 2-hydroxy group for mediating RNA
CC interference. (I) is useful for treating diseases e.g., asthma, allergic
CC rhinitis, sinusitis, inflammation, allergy, cystic fibrosis, pulmonary
CC vasoconstriction or hypertension, emphysema, irritable bowel syndrome,
CC Alzheimer's disease or urinary incontinence. (I) has increased resistance
CC towards nuclease. Double stranded short interfering nucleic acid molecule
CC was produced by solid phase oligonucleotide synthesis method. This
CC sequence represents an example of a siRNA molecule of the invention.

PT cholinergic receptor muscarinic 3 RNA, useful for treating or preventing
PT respiratory and pulmonary diseases, e.g. chronic obstructive pulmonary
PT disease.
XX
PS Claim 33; SEQ ID NO 86; 184bp; English.
XX
CC The invention relates to a chemically synthesized double stranded short
CC interfering nucleic acid (siNA) molecule that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
CC (RNAI). The siNA molecule, compounds, compositions, and methods are
CC useful for treating or preventing respiratory and pulmonary diseases,
CC disorders, and/or conditions, including chronic obstructive pulmonary
CC disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
CC cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The
CC present sequence represents a cholinergic receptor muscarinic 3 siRNA.

CC cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
CC (RNAi). The siNA molecule, compounds, compositions, and methods are
CC useful for treating or preventing respiratory and pulmonary diseases,
CC disorders, and/or conditions, including chronic obstructive pulmonary
CC disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
CC cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The

DR New short interfering nucleic acid molecule that directs cleavage of a
XX cholinergic receptor muscarinic 3 RNA, useful for treating or preventing
PT respiratory and pulmonary diseases, e.g. chronic obstructive pulmonary
PT disease.
PS Claim 33; SEQ ID NO 176; 184bp; English.
XX The invention relates to a chemically synthesized double stranded short
XX interfering nucleic acid (siNA) molecule that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
CC (RNAi). The siNA molecule, compounds, compositions, and methods are
CC useful for treating or preventing respiratory and pulmonary diseases,
CC disorders, and/or conditions, including chronic obstructive pulmonary
CC disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
CC cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The
CC present sequence represents a cholinergic receptor muscarinic 3 siRNA.

PT cholinergic receptor muscarinic 3 RNA, useful for treating or preventing
PT respiratory and pulmonary diseases, e.g. chronic obstructive pulmonary
PT disease.
XX
XX Claim 33; SEQ ID NO 153; 184bp; English.
XX
XX The invention relates to a chemically synthesized double stranded short
CC interfering nucleic acid (siNA) molecule that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
CC (RNAi). The siNA molecule, compounds, compositions, and methods are
CC useful for treating or preventing respiratory and pulmonary diseases,
CC disorders, and/or conditions, including chronic obstructive pulmonary
CC disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
CC cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The
CC present sequence represents a cholinergic receptor muscarinic 3 siRNA.

 CC
 XX The invention relates to a chemically synthesized double stranded short
 CC interfering nucleic acid (siNA) molecule that directs cleavage of a
 CC cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
 CC (RNAi). The siNA molecule, compounds, compositions, and methods are
 CC useful for treating or preventing respiratory and pulmonary diseases,
 CC disorders, and/or conditions, including chronic obstructive pulmonary
 CC disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
 CC cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The
 CC present sequence represents a cholinergic receptor muscarinic 3 siRNA.

PS
XX
XX The invention relates to a chemically synthesized double stranded short
CC interfering nucleic acid (siNA) molecule that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
CC (RNAI). The siNA molecule, compounds, compositions, and methods are
CC useful for treating or preventing respiratory and pulmonary diseases,
CC disorders, and/or conditions, including chronic obstructive pulmonary
CC disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
CC cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The
CC present sequence represents a cholinergic receptor muscarinic 3 siRNA.

XX
XX  New short interfering nucleic acid molecule that directs cleavage of a
PT  cholinergic receptor muscarinic 3 RNA, useful for treating or preventing
PT  respiratory and pulmonary diseases, e.g. chronic obstructive pulmonary
PT  disease.
XX
PS  Claim 33; SEQ ID NO 121; 184bp; English.
XX
XX  The invention relates to a chemically synthesized double stranded short
CC  interfering nucleic acid (siNA) molecule that directs cleavage of a
CC  cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
CC  (RNAi). The siNA molecule, compounds, compositions, and methods are
CC  useful for treating or preventing respiratory and pulmonary diseases,
CC  disorders, and/or conditions, including chronic obstructive pulmonary
CC  disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
CC  cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The
CC  present sequence represents a cholinergic receptor muscarinic 3 siRNA.

Claim 33, SEQ ID NO 33, 184pp, English.
New short interfering nucleic acid molecule that directs cleavage of a cholinergic receptor muscarinic 3 RNA, useful for treating or preventing respiratory and pulmonary diseases, e.g. chronic obstructive pulmonary disease.

The invention relates to a chemically synthesized double stranded short interfering nucleic acid (siRNA) molecule that directs cleavage of a cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference (RNAi). The siRNA molecule, compounds, compositions, and methods are useful for treating or preventing respiratory and pulmonary diseases, disorders, and/or conditions, including chronic obstructive pulmonary disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies, cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The present sequence represents a cholinergic receptor muscarinic 3 siRNA.

PT
PS Claim 33; SEQ ID NO 48; 184bp; English.
XX
XX The invention relates to a chemically synthesized double stranded short
CC interfering nucleic acid (siRNA) molecule that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
CC (RNAi). The siRNA molecule, compounds, compositions, and methods are
CC useful for treating or preventing respiratory and pulmonary diseases,
CC disorders, and/or conditions, including chronic obstructive pulmonary
CC disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
CC cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The
CC present sequence represents a cholinergic receptor muscarinic 3 siRNA.

CC interfering nucleic acid (siNA) molecule that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA via RNA interference
CC (RNAi). The siNA molecule, compounds, compositions, and methods are
CC useful for treating or preventing respiratory and pulmonary diseases,
CC disorders, and/or conditions, including chronic obstructive pulmonary
CC disease, asthma, allergic rhinitis, sinusitis, inflammation, allergies,
CC cystic fibrosis, Alzheimer's disease, and/or urinary incontinence. The
CC present sequence represents a cholinergic receptor muscarinic 3 siRNA.

XX Novel chemically synthesized double stranded short interfering nucleic
XX acid molecule that directs cleavage of cholinergic receptor muscarinic 3
XX RNA through RNA interference, useful for treating asthma.
XX
XX Disclosure; SEQ ID NO 98; 84pp; English.
XX
XX The invention relates to a chemically synthesized double stranded short
XX interfering nucleic acid (siNA) molecule (I) that directs cleavage of a
XX cholinergic receptor muscarinic 3 (CHRM3) RNA through RNA interference,
XX where each strand of (I) has 19-23 nucleotides, and does not require the
XX presence of nucleotides having a 2-hydroxy group for mediating RNA
XX interference. (I) is useful for treating diseases e.g., asthma, allergic
XX rhinitis, sinusitis, inflammation, allergy, cystic fibrosis, pulmonary
XX vasoconstriction or hypertension, emphysema, irritable bowel syndrome,
XX Alzheimer's disease or urinary incontinence. (I) has increased resistance
XX towards nuclease. Double stranded short interfering nucleic acid molecule
XX was produced by solid phase oligonucleotide synthesis method. This
XX sequence represents an example of a siRNA molecule of the invention.

XX
XX Novel chemically synthesized double stranded short interfering nucleic
XX acid molecule that directs cleavage of cholinergic receptor muscarinic 3
XX RNA through RNA interference, useful for treating asthma.
XX
XX Disclosure; SEQ ID NO 70; 84pp; English.
XX
XX The invention relates to a chemically synthesized double stranded short
XX interfering nucleic acid (siNA) molecule (I) that directs cleavage of a
XX cholinergic receptor muscarinic 3 (CHRM3) RNA through RNA interference,
XX where each strand of (I) has 19-23 nucleotides, and does not require the
XX presence of nucleotides having a 2-hydroxy group for mediating RNA
XX interference. (I) is useful for treating diseases e.g., asthma, allergic
XX rhinitis, sinusitis, inflammation, allergy, cystic fibrosis, pulmonary
XX vasoconstriction or hypertension, emphysema, irritable bowel syndrome,

CC Alzheimer's disease or urinary incontinence. (I) has increased resistance
CC towards nuclease. Double stranded short interfering nucleic acid molecule
CC was produced by solid phase oligonucleotide synthesis method. This
CC sequence represents an example of a siRNA molecule of the invention.

 CC The invention relates to a chemically synthesized double stranded short
 CC interfering nucleic acid (siNA) molecule (I) that directs cleavage of a
 CC cholinergic receptor muscarinic 3 (CHRM3) RNA through RNA interference,
 CC where each strand of (I) has 19-23 nucleotides, and does not require the
 CC presence of nucleotides having a 2-hydroxy group for mediating RNA
 CC interference. (I) is useful for treating diseases e.g., asthma, allergic
 CC rhinitis, sinusitis, inflammation, allergy, cystic fibrosis, pulmonary
 CC vasoconstriction or hypertension, emphysema, irritable bowel syndrome,
 CC Alzheimer's disease or urinary incontinence. (I) has increased resistance
 CC towards nuclease. Double stranded short interfering nucleic acid molecule
 CC was produced by solid phase oligonucleotide synthesis method. This
 CC sequence represents an example of a siRNA molecule of the invention.

XX
XX Novel chemically synthesized double stranded short interfering nucleic
PT acid molecule that directs cleavage of cholinergic receptor muscarinic 3
PT RNA through RNA interference, useful for treating asthma.
XX
XX
XX Disclosure; SEQ ID NO 189; 84bp; English.

The invention relates to a chemically synthesized double stranded short interfering nucleic acid (siNA) molecule (I) that directs cleavage of a cholinergic receptor muscarinic 3 (CHRM3) RNA through RNA interference, where each strand of (I) has 19-23 nucleotides, and does not require the presence of nucleotides having a 2-hydroxy group for mediating RNA interference. (I) is useful for treating diseases e.g., asthma, allergic rhinitis, sinusitis, inflammation, allergy, cystic fibrosis, pulmonary vasoconstriction or hypertension, emphysema, irritable bowel syndrome, Alzheimers disease or urinary incontinence. (I) has increased resistance towards nuclease. Double stranded short interfering nucleic acid molecule was produced by solid phase oligonucleotide synthesis method. This sequence represents an example of a siRNA molecule of the invention.

PS Disclosure; SEQ ID NO 111; 84pp; English.
XX
XX The invention relates to a chemically synthesized double stranded short
CC interfering nucleic acid (siNA) molecule (I) that directs cleavage of a
CC cholinergic receptor muscarinic 3 (CHRM3) RNA through RNA interference,
CC where each strand of (I) has 19-23 nucleotides, and does not require the
CC presence of nucleotides having a 2-hydroxy group for mediating RNA
CC interference. (I) is useful for treating diseases e.g., asthma, allergic

CC rhinitis, sinusitis, inflammation, allergy, cystic fibrosis, pulmonary
CC vasoconstriction or hypertension, emphysema, irritable bowel syndrome,
CC Alzheimer's disease or urinary incontinence. (I) has increased resistance
CC towards nucleases. Double stranded short interfering nucleic acid molecule
CC was produced by solid phase oligonucleotide synthesis method. This
CC sequence represents an example of a siRNA molecule of the invention.

 PT RNA through RNA interference, useful for treating asthma.
 XX
 PS Disclosure; SEQ ID NO 51; 84pp; English.
 XX
 CC The invention relates to a chemically synthesized double stranded short
 CC interfering nucleic acid (siNA) molecule (I) that directs cleavage of a
 CC cholinergic receptor muscarinic 3 (CHRM3) RNA through RNA interference,
 CC where each strand of (I) has 19-23 nucleotides, and does not require the
 CC presence of nucleotides having a 2-hydroxy group for mediating RNA
 CC interference. (I) is useful for treating diseases e.g., asthma, allergic
 CC rhinitis, sinusitis, inflammation, allergy, cystic fibrosis, pulmonary
 CC vasoconstriction or hypertension, emphysema, irritable bowel syndrome,
 CC Alzheimer's disease or urinary incontinence. (I) has increased resistance
 CC towards nuclease. Double stranded short interfering nucleic acid molecule
 CC was produced by solid phase oligonucleotide synthesis method. This
 CC sequence represents an example of a siRNA molecule of the invention.
